FOCUS

building (Group 1): Rebuilding Chassis

building (Group 2): Attaching the grabby part to the arm

SUMMARY

building (Group 1): We disassembled the chassis and cut down the parts so that the frame will be 12x12 and with wheels it will be 12x16. We are working to add chains so that the motors will fit in the frame.

building (Group 2): We made sure that the belt on the green cone grabber was alligned. Then we extended the length of the arm to reach the medium pole. Then we began attaching the claw part to the arm.

CHALLENGES

building (Group 1): Hard to find the right size belt

building (Group 2): Couldn't find the right screws, allignment of the claw was off

NEXT STEPS

building (Group 1): Continue to build the 13620 chassis

building (Group 2): Finish attaching the claw
