FOCUS

entire team: Decorations

coding (Group 1): arm

business (Group 1): Engineering portfolio, judging script

SUMMARY

entire team: We researched decoration ideas to make our space a little bit more homey. We started designing and creating a poster with influential scientists and created a world robot poster

coding (Group 1): we got the servo to work and updated the controls for the arm

business (Group 1): We started on the judging script for qualifiers and worked on formatting both engineering portfolios.

CHALLENGES

entire team: slight delirium

coding (Group 1): the arm isn't working

business (Group 1): It was difficult to stay fully on task towards the end of the meeting and finding new ways to be creative with the EP layouts.

NEXT STEPS

entire team: continue postering

coding (Group 1): get the arm to work

business (Group 1): Continue working on the engineering portfolios and finish the judging script.
